

Group Agreement and Plan

Group Members

Name	Contact information	Signature
Syed Muhammad Mahdi	105172195@student.swin.edu.au	Mahdi
Binh Thai Nguyen	104188845@student.swin.edu.au	Binh
Mehak Wadhwa	104835769@student.swin.edu.au	Mehak
Bunmi Adegbola	104935575@student.swin.edu.au	Bunmi
Anh Vu Le	104653505@student.swin.edu.au	Vu

Group name (optional)

Lucky Five

Group style and roles

Our team is going to use a collaborative style of working, in which every member of the team has a particular part of the system that they are expected to work on, and take care of one another when necessary. Constant communication will also be practiced so that all components get to be integrated easily and on time.

Role Distribution

Binh: Face Recognition with Metric Learning and Evaluation (similarity comparison, performance analysis) (ROC, AUC).

Bunmi: Will develop Classification-Based Face Recognition Model based on CNN and softmax.

Anh Vu: In charge of implementing the Anti-Spoofing (Liveness Detection) component to identify real vs fake faces.

Mahdi: The person in charge of creating the Emotion Detection Model that will categorize facial expressions of happy, sad, and neutral.

Mehak: In-charge of System Integration and User Interface (GUI) with webcam input and real-time display of results.

Responsibility for Deliverables

Everyone will accomplish his/her duties, although we will revise and assist one another in the work to achieve quality and consistency. The end product or submission will be done in a group.

Communication and Representation

We will use online communication tools like MS Teams and shared documents to communicate regularly. The group will have one of its members who will act as the group representative and communicate to the tutor where there is need.

Timeline

*Since we will be working on a project that begins in **Week 6**, our group will use a compressed timeline to make sure that all the tasks are carried out in time. We hope that we will complete the project in time before the final deadline to test and make improvements.*

Week 6: Finalise project plan, allocate roles, create dataset, and start face recognition models.

Week 7: Complete face recognition and start anti-spoofing module

Week 8: Complete anti-spoofing and emotion detection

Week 9: Add all parts and create GUI.

Week 10: Testing and debugging

Week 11-12: Final report, demo video, and submission.

*We will have a meeting **1-2 times** a week to monitor progress, talk about challenges, and support each other. Each member will be actively involved and assist one another to ensure that the project is accomplished successfully within the limited time.*

Communication Plan

Decide and document how your group will communicate with each other and collaborate on a regular basis during the project. This could include meeting via Zoom, communicating via a Facebook group, Canvas, using cloud services for shared documents etc. How often and how will you communicate? What are your expectations on others responding to your communications?

Our group will communicate regularly using a combination of synchronous and asynchronous tools to effectively collaborate throughout the project. We will primarily use MS Teams for quick updates and formal discussions. For more structured communication and file sharing, we will be using Google Drive.

On-track behaviours

What behaviours will result in great group outcomes?

- Attending scheduled meetings on time and coming prepared, having completed agreed tasks.
- Communicating early if there are problems meeting a deadline or understanding a task
- Respectfully listening to each other's ideas and giving constructive feedback.
- Completing work to an agreed quality standard and on time.
- Actively participating in discussions and decision-making.

Off-track behaviours

What behaviours would result in group outcomes that aren't great?

- Missing meetings deadlines without prior notice or explanation.
- Not Responding to messages within the agreed timeframe.
- Ignoring agreed decisions, roles or timelines.
- Disrespectful communication, including dismissive comments or personal attacks.

Resolving tensions

*In case of any disagreements or off-track behaviour, our group will resolve any of these issues by communicating **openly and respectfully**. The first step will be to settle down in a calm discussion between the members involved to get to know the perspective of each other and arrive at a fair solution.*

In case the problem persists, then it will be addressed as a team in a meeting to allow all to assist in solving the problem. Instead of blaming people, we will concentrate on having a positive and supportive atmosphere.

The group will support the member when he/she cannot meet the deadlines or duties and will reassign tasks when needed so that no progress will be disrupted.

In the case the issue remains unsolved, we will consult the tutor to address the situation in the right way.

Team Expectations:

1. The members will finish their assigned tasks on time.

2. Members will visit meetings on a regular basis (12-2 times a week) and be prepared.

3. Communication among everyone will be clear and timely response to messages.

4. During the discussions, members will be respectful of each other and their ideas and opinions.

5. The members will assist one another in case they have problems in their work.

6. The quality of work that each member submits must be good and checked.

7. Members will be actively involved and help in the project.
